CHILDREN'S PROGRAM

Dear Friend,

I have always been thoroughly enticed, compelled and enamored by the eyes of the children... ever so evocative and captivating! It is when I truly believe that the eyes are "windows to the soul", and when I feel gratified to have shared in and been graced by their lives.

Your donations and support over the years has helped ensure that so many saddened and suffering eyes have become transformed to ones of health and joy. Through your contributions, Makindu Children's Centre is now supporting nearly 400 children, with additional, extended services reaching almost 1,500 vulnerable kids within the Makindu region.

MCC is experiencing some tentative times with the recent world market crisis and decreased donations, compounded by the worst drought to strike the Horn of Africa in over 60 years. This drought has forced hundreds of thousands of refugees from neighboring countries into Kenya in search of food and medical aid, strangulating the already meager supplies available for the rest of the country.

Consequently prices for food and daily essential needs within the country have soared, and government supplies are being rationed throughout all districts.

The program is also currently in between funding cycles from USAID, after successfully completing their first cycle of 5 years. MCC has fortunately been chosen to receive additional USAID support, but the funding has been delayed amidst slow political and bureaucratic processes.

Your donations are needed now more than ever to sustain our efforts. Please consider an additional donation to help the children and share that precious gift of hope.

Tupo pamoja ("we are together")...

Together, we can do this!!

Asante sana,

Winnie Barron

P.S . Please consider becoming a sustaining supporter with easy monthly contributions via our website.
